Tips

- Be prepared to discuss your experience with system design and architecture in detail, explaining trade-offs and rationale.
- Highlight your leadership, mentorship, and collaboration skills, providing specific examples of how you've positively influenced your team.

- Demonstrate your ability to take ownership of projects, solve complex problems independently, and drive technical initiatives.
- Showcase your communication skills, especially when explaining complex technical concepts to both technical and non-technical audiences.
- Ask insightful questions about the team, technology stack, company culture, and business challenges to demonstrate your engagement and strategic thinking.
